US-VEW-401-24-14

JUS-VEW-401-24-14

Sequence 14, Application US/08461234

Patent No. 5821238

GENERAL INFORMATION:

APPLICANT: Pastan, Ira H.

APPLICANT: Pastan, Ira H.

APPLICANT: FitzGerald, David J.

TITLE OF INVENTION: Recombinant Pseudomonas Exotoxin with TITLE OF INVENTION: Increased Activity

NUMBER OF SEQUENCES: 16

CORRESPONDENCE ADDRESS: 6

CORRESPONDENCE ADDRESS: 6

CORRESPONDENCE ADDRESS: 6

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             g
                                                                                                       Sequence 4, Application US/09215035
Patent No. 6153430
GENERAL INFORMATION:
APPLICANT: Pastan, Ira
APPLICANT: Chang, Kai
ATTLE OF INVENTION: Mesothelin, a Differentiation Antigen
TITLE OF INVENTION: Present on Mesothelium, Mesotheliomas and Ovarian Cancers
TITLE OF INVENTION: and Methods and Kits for Targeting the Antigen
NUMBER OF SEQUENCES: 8

Patent No. US20020142000A1

GENERAL INFORMATION:

APPLICANT: Lake, Philip

APPLICANT: Lake, Philip

APPLICANT: Wright, Richard M.

TITLE OF INVENTION: Anti-CD3 Immunotoxins and Therapeutic Uses Therefor FILE REFERENCE: CGC 4-31157A/USN

CURRENT APPLICATION NUMBER: US/09/480,236

CURRENT FILING DATE: 2000-01-10

NUMBER OF SEQ ID NOS: 22

SOFTWARE: PatentIn Ver. 2.0
                                                                                                                                            267206,

GENERAL INFORMATION:

APPLICANT: FitzGerald, David J.

APPLICANT: The Government of the United States of America
APPLICANT: The Government of the United States of America
APPLICANT: as represented by The Secretary of the
APPLICANT: Department of Health and Human Services
APPLICANT: Department of Health and Human Services
TITLE OF INVENTION: A Chimeric Protein Comprising Non-Toxic Pseudomonas
TITLE OF INVENTION: A Exotoxin A and Type IV Pilin Sequences
FILE REFRENCE: 015280-429100US
CURRENT APPLICATION NUMBER: US/10/432,412
CURRENT FILING DATE: 2003-05-21
PRIOR APPLICATION NUMBER: WO PCT/US01/49143
PRIOR APPLICATION NUMBER: WO PCT/US01/49143
PRIOR FILING DATE: 2001-12-20
NUMBER OF SEQ ID NOS: 36
